

— FOUR WAYS WE HELP PRACTICES

A practice patients trust, *running on rails.*

Concierge doctors, dental groups, and med spas win on local reputation and fast response. We build the site, the visibility, and the front-desk automation that fill the schedule, with patient privacy protected.

1

CUSTOM WEB

A site that signals trust

A calm, professional website that explains your care model, loads fast, and reads clearly to AI, so the right patients understand the fit before they call.

2

AI VISIBILITY

Found by the right patients

Show up when patients ask an AI for "top concierge doctor" or "best dentist in Miami." We fix the signals AI uses to recommend a practice.

3

CUSTOM SAAS

A front desk that never chases

Secure intake, scheduling, SMS and email reminders, automatic rebooking, and review requests that go out at check-out, so no-shows drop and reviews keep coming.

4

CUSTOM AI & FRACTIONAL CAIO

An assistant that answers 24/7

A HIPAA-conscious assistant that answers patient questions in under 60 seconds and books visits any hour, trained on your practice, with no medical advice.

Built with patient privacy in mind: HIPAA-conscious handling, clear scope limits, and no diagnosis or treatment claims from any automated tool.

WHERE TO START

Start with an AI Visibility audit.

We score where you stand in AI search today, show the gaps against competitors, and lay out a 90-day plan. It credits toward the full engagement.
